Mr. F. H. Parsons,
Custodian Library and Archives
U. S. Coast and Geodetic Survey,
Washington, D.C.

Dear Sir:

I have addressed a report of my work for the past six months in your Division to the Assistant in Charge of Office.

The records of the work done therewith turn over to you for safe keeping until another season, when I may be permitted to resume and complete the task.

The specimens of sea bottoms which have been arranged and catalogued are placed together ^{by Sections} on the third floor of the Butler (fireproof) building. Each box and package is plainly marked with the number of the Section and number of hydrographic sheet to which it belongs.

The specimens yet to be investigated are

on the fourth floor of the Butler building,
those collected by the Steamer "Blake" being
piled separately from the others.

Mr. A. Luidenkoll has several boxes of
specimens in his charge but the list is in the
package of records sent herewith.

Yours very truly,

W. Irving Urial,
Assistant U.S. Land & Survey.
